Frequencies for local 5G networks in Germany

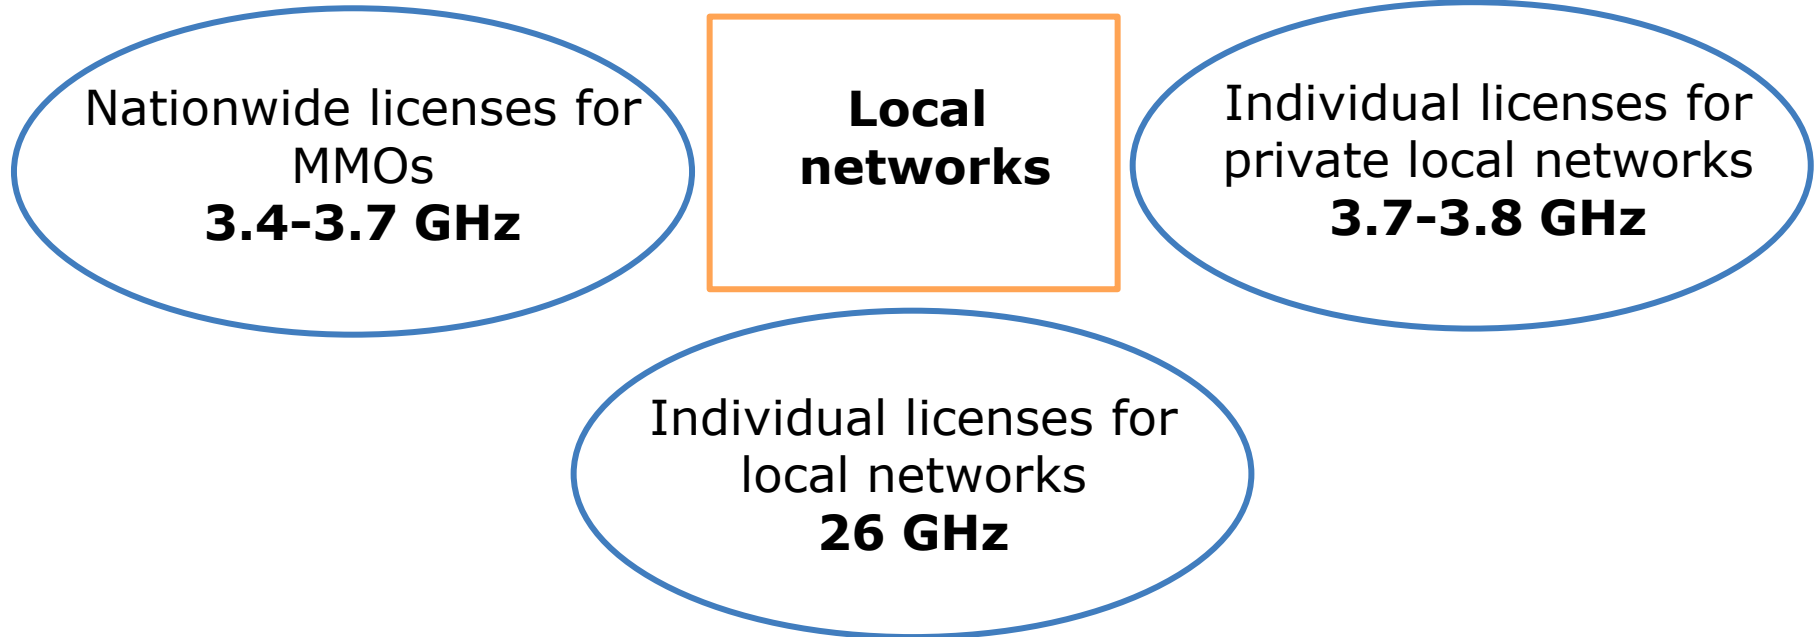

Josch Luxa, Engineer Bundesnetzagentur, Section 226
Berlin, Germany

www.bundesnetzagentur.de

Frequencies for private/ local networks:

Conditions

Individual license for private premises;

Free network planning by the licensee by respecting the following points:

- No telecommunication services for the public is allowed;
- Optimization of the frequency usage efficiency by planning
- **Operators of geographically adjacent radio networks are obliged to negotiate operator agreements.**

→ No interference, no intervention from Administration

Conditions

Similar to 3700-3800 MHz but:

- Not restricted to own premises
- Also public networks are allowed
- Coordination with incumbent services (FS/ FSS)

Key element for operators of geographically adjacent radio networks → **operator agreements**

Conditions allow freedom for all operators to find best suitable solution for their network!
